Necessary first-aid m	easures
-----------------------	---------

Inhalation Overexposure is most likely to occur dealing with large

quantities and in an enclosed space with inadequate ventilation. Remove to fresh air, Allow patient to rest in a

well-ventilated area. Seek medical attention.

Skin Contact Prolonged and excessive application to large areas of

skin may cause contact dermatitis. Wipe off and wash exposed area with soap and water. Get medical

attention if irritation develops.

Eye Contact Check for and remove any contact lenses. Rinse

immediately with clean water for at least 15 minutes.

Seek medical attention.

Ingestion Do not induce vomiting. Loosen tight clothing such as a

collar, tie, belt or waistband. Perform gastric lavage.

the chemical

Fire Hazard.

Irritating and highly toxic gases may be generated by thermal decomposition or combustion. Do not breathe fumes. Keep product and empty container away from

sources of ignition.

**Hazardous combustion products** 

Special protective actions for

fire-fighters

Carbon oxides

Fire fighters should wear positive pressure self-

contained breathing apparatus.

**Specific extinguishing methods** Cool containers exposed to flame with water spray.

Spray extinguishing media directly into base of fire.

### **Section 6. ACCIDENTAL RELEASE MEASURES**

### Personal precautions, protective equipment and emergency procedures

Non-emergency personnel Before cleaning any spill or leak, individuals involved in

spill cleanup must wear appropriate Personal Protective Equipment (i.e. goggles, gloves). Remove spilled material with absorbent material (I.e. sand, earth, diatomaceous earth, vermiculite) and place into appropriate closed container(s) for disposal.

Emergency responders Before cleaning any spill or leak, individuals involved in

spill cleanup must wear appropriate Personal Protective Equipment. Deny entry to all unprotected individuals. Maximize ventilation (open doors and windows).

Environmental precautions Keep spills and cleaning runoffs out of nearby sewers

and open bodies of water.

Methods and materials for containment and cleaning up

Dike and contain spill with inert material (e.g. sand or earth). Transfer soiled material to containers for recovery or disposal and solid diking material to separate containers for proper disposal. Dispose of properly in accordance with local or national regulations. Wash all affected area and outside of container with plenty of warm water and soap. Remove any contaminated clothing and wash thoroughly before

reuse.

### Section 7. HANDLING AND STORAGE

**Precautions for safe handling** No special control measures required for normal

handling. Normal room ventilation is expected to be adequate for routine handling. Follow good industrial practice as to housekeeping, personal hygiene and avoidance of prolonged or repeated contact with the skin or eyes. Keep away from fire, sparks and heated

surfaces.

**Conditions for safe storage** Keep away from heat and sources of ignition. Keep in a

cool, well-ventilated place. Keep away from oxidizing agents. Keep out of reach of children. Keep container tightly closed. Store in suitable labeled containers at

temperatures not exceeding 30°C.
