Section 4. FIRST AID MEASURES

Necessary first-aid measures

Inhalation Overexposure is most likely to occur dealing with large quantities and in an enclosed space with inadequate ventilation. Remove to fresh air. Allow patient to rest in a well-ventilated area. Seek medical attention.

Skin Contact Prolonged and excessive application to large areas of skin may cause contact dermatitis. Wipe off and wash exposed area with soap and water. Get medical attention if irritation develops.

Eye Contact Check for and remove any contact lenses. Rinse immediately with clean water for at least 15 minutes. Seek medical attention.

Ingestion Do not induce vomiting. Loosen tight clothing such as a collar, tie, belt or waistband. Perform gastric lavage. Treat symptomatically. Seek medical attention.

Most important symptoms / No information available.

effects, both acute and delayed

Note(s) to physician Treat symptomatically.

Section 5. FIRE FIGHTING MEASURES

Suitable extinguishing media	Use dry chemical powder, water spray, fog or foam.
Unsuitable extinguishing media	High volume water jet
Specific hazards arising from the chemical	Fire Hazard. Irritating and highly toxic gases may be generated by thermal decomposition or combustion. Do not breathe fumes. Keep product and empty container away from sources of ignition.
Hazardous combustion products	Carbon oxides
Special protective actions for fire-fighters	Fire fighters should wear positive pressure self-contained breathing apparatus.
Specific extinguishing methods	Cool containers exposed to flame with water spray. Spray extinguishing media directly into base of fire.

Section 6. ACCIDENTAL RELEASE MEASURES

Personal precautions, protective equipment and emergency procedures	
Non-emergency personnel	Before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Personal Protective Equipment (i.e. goggles, gloves). Remove spilled Material with absorbent material (i.e. sand, earth, diatomaceous earth, vermiculite) and place into appropriate closed container(s) for disposal.
Emergency responders	Before cleaning any spill or leak, individuals involved in spill cleanup must wear appropriate Personal Protective Equipment. Deny entry to all unprotected individuals. Maximize ventilation (open doors and windows).
Environmental precautions	Keep spills and cleaning runoffs out of nearby sewers and open bodies of water.
Methods and materials for containment and cleaning up	Dike and contain spill with inert material (e.g. sand or earth). Transfer soiled material to containers for recovery or disposal and solid diking material to separate containers for proper disposal. Dispose of properly in accordance with local or national regulations. Wash all affected area and outside of container with plenty of warm water and soap. Remove any contaminated clothing and wash thoroughly before reuse.

Section 7. HANDLING AND STORAGE

Precautions for safe handling	No special control measures required for normal handling. Normal room ventilation is expected to be adequate for routine handling. Follow good industrial practice as to housekeeping, personal hygiene and avoidance of prolonged or repeated contact with the skin or eyes. Keep away from fire, sparks and heated surfaces.
